(Class XIIth)

Section – A

(Reading comprehension)

I. **Read the passage and answer the question from 1 to 10 :**

The famous pyramid of Khufu (or Cheops) in Egypt is the only one of the seven Wonders of the Ancient world that remains intact to this day. The ancient Egyptians placed the mummies of their pharaohs in pyramids because they believed the bodies would not decay inside these structures.

Many believe that the pyramid of Khufu has special powers. Not magical powers, but a power peculiar to the very structure of pyramid. They say that the pyramid power can make plants grow faster and sharpen knives. It is believed that it is the shape of the pyramid that gives it power. The shape directs energy on anything that is put inside a pyramid.

There are many stories about the pyramid's wonderful benefits. People sleep better. Headaches go away. Seeds grow faster. Old jewellery looks polished. It is said that these things happen by just putting these items inside a model of the pyramid of Khufu.

In 1975, the Coach of a hockey team was worried about his team, they had been performing poorly. When the coach heard about the pyramid power, he hung twenty-five small pyramids above the locker-room door. All the team members had to pass under them. After standing for ten minutes under a pyramid, the team captain scored five goals.

Do pyramids really have power? Was the pyramid of Khufu more than just a beautiful monument? We cannot know for sure until a proper scientific research is carried out to verify these claims.
